July hath XXXI. days.

Breath not a veine, neither do Physick take,
Unless thou wilt a Breach in Nature make.
Drink not too much of wine, Fly wanton Toys,
Lest thou deprive thy self of hop'd for Joys.

September hath SIXTY days

Cheer up thy self, and now such Physick take
As may thy Body sound and healthful make:
Take heed of Surfeits, naughty fruits forbear,
If thou intendst to live another year.

Grata jacit pueris September ab arbore poma.

Yet Phisicks help is not to be refus'd
Of such as want and warily can use it:
Good sport abroad for such as have Good Hounds,
But best at home for him that hath no Grounds.

An Astrologo-Physical Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust me then to these Rules Astrological, to be observed for the advantage for the sick;

| | | | | | |
|---------|---|--------------|-------------|---|-------------|
| Let the | { | Sanguine | { bleed the | { | ♄, or ♀. |
| | | Cholerick | | | ♁, or ♀. |
| | | Phlegmatick | | | ♂, or ☿. |
| | | Melancholly. | | | ♁, ☿, or ♀. |

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Elecluaries, when the ☾ is in ♁; with Pills, when she is in ♄; with Portions, when in ♀, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lieth above the Stomach; is being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ☿, ♀, or ♄ in any good Aspect of ♄, ♀, or ☉.

Glysters are most conveniently administered, when the ☾ is in ♀, ☿, or ♀, posited as before.

Good to stop Fluxes, or Rheumes. or Issues, when the ☾ is in any of the Earthly Signs, viz. ♄, ♀, or ♀; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♁, ♄, ☿, or ♄, in Aspect of ♄, or ♀.

Convenient to cut Hair, the ☾ being in ♄, ♄, ☿, or ♄, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

TRIGGE 1694.

Of the ECLIPSES of the Sun and Moon, which will Happen in this Year 1694.

There will be Four Eclipses of the Luminaries in this Year, viz, Two of the Sun, and two of the Moon. Two Visible and two Invisible. Argol will allow us but Three. They thus follow.

I. The First will be a *Lunar Deliquium*, on *January* the first day, about Noon, and therefore invisible to us.

II. The Second will be a small *Solar Defect*, on *June* 12. near five of the Clock, afternoon, celebrated in $1^{\circ} . 27'$ of *Cancer*, the Digits Eclipsed by the *British Tables*, $1^{\circ} . 51' . 36''$.

| | Visible Mars, Sol and Luna | | 4. | 59. | 10. |
| | End of the Eclipse | | 5. | 16. | 57. |
| | Total Duration | | 1. | 19. | 3. |

The Sun is Eclipsed on the South-side of his Body, though the Noble Argol hath made it on the North, In these Matters 'tis easie to Err, and therefore we ought not to take any thing upon trust. The Eclipse being so small, I forbear to insert the Type thereof.

III. The third will be a *Lunar Eclipse*, in *Cap.* 15 $0^{\circ} . 6'$ on *June* 26. about our Midnight. This also will be a very small Eclipse, viz. the Parts Eclipsed will be but $56' . 30''$ not one minute.

| | Total Duration | | 1. | 1. | 38 |

Argol tells us this Eclipse will Happen on the South-side of the Moons Body, but by the *British Tables* (which I follow, esteeming them as good as any yet Published) it will be on the North-side. I omit also to insert the type of this Eclipse, it being so minute.

TRIGGE 1694.

IV. The Last will be a Solar Defect, on *December* the 6th Day, about 5 Afternoon, Invisible as to us. And therefore probably omitted by the Famous *Angel*.

Thus much for Eclipses 1694.

Something touching the Four Seasons, their Natures, Descriptions, &c.

I. Of the Spring-Quarter.

The Spring, the most delightful Season of the whole year assumes its beginning when the Sun enters *Aries*, which this year happens on *Mar. 9*, 12 houres 39 min. P.M. or afternoon at which time *Libra* 9 degr. Culminates, and *Sagitta* 39 deg. ascends the Eastern Finitor in the Latitude of *London*.

This Glorious Season continueth all that time the Sun is passing thorow the three first Northern Signs, viz. *Aries*, *Taurus*, *Gemini*.

At the beginning of this Season the Sun maketh Days and Nights equal all the World over. And then leaving the Inhabitants of the Southern Hemisphere, doth refresh and revive with his cherishing Beams, all those that dwell in these Northern parts of the Earth.

The Astronomical Rulers of this quarter, are, *Mars*, *Venus*, *Mercury*, who naturally import Vigour, Delight and Mutability. And accordingly, while the Sun is in *Aries*, all Vegetables put forth their Leaves and Blossoms, and Nature expresses a Spring-like force in all her Operations.

As the Sun continues in *Taurus* the Leaves and Flowers expand themselves after a delightful manner, and *Diana* *Vesta* opens her Paradise of Pleasures to all her Children, to exercise their Souls and Senses.

All the time the Sun remains in *Gemini*, Natures Limners are at Work, and out of *Mars* his vigour, and the Delights of *Venus*, Paints to the World a Million of pleasing Varieties, that Mankind thereby may be taught how to abate his Stock of Melancholy, (the preceeding Winter had impress'd upon him) by Contemplating those glorious but harmless Pieces of Natures Workmanship, and need not be obliged to the Conversation of Treacherous Company, nor yet to an Exhilaration afforded from a Tavern or *Musick House*.

TRIGGE 1694.

The curious and delightful Emblems of the Spring are void of Fraud, and know not the Art of Trepanning, Natures innocent Syrens tempt none to the Rock of Destraction. *Ulysses* may here Sit soberly, and without being bound to his Ships Mast, may with pleasure open his Eare to these mellifluous Charms.

But now, as if God and Nature never intended Mankind should be glutt'd with beholding of One Object continually, — The glorious, amiable and youthful Spring, with all its Verdant Varieties, leaves us.... And we must next Approach unto —

II. The Summer-Season.

The Summer quarter begins where the Spring ends: and the Sun here mounting his *Apotheon* Chair of Honour, is removed to his greatest distance from the Earth, making the largest quantity of Sunshine, and least portion of Shadow: Or, (which is all one) longest Days and shortest Nights to us on this side the Equator.

This Season now begins on *June 10.* 14. houres, 36 after-noon, at which time *Aquarius* Culminates, and *Gemini* Rises in the East. And it continues all the time the Sun makes his Progress through *Cancer, Leo, Virgo*; the Grand Rulers whereof are *Luna, Sol, Mercury*,

The Moon here precedes the Sun in Dominion, and all the Births of the preceding Spring are swell'd into a pleasing Drapery, and so continue for the first Summer Month; Then the Sun ascends a particular, as well as general Power of Governing, and by his great Heat reduces all Vegetables from their Anasarchal Swelling to a positive Hectick Fever, thereby ripening the Seeds of Flowers, Herbs, Fruits, &c. And this is the Work of the second Month of this Season.

After the Sun hath performed his excellent Office, *Mercury* enters upon his Regency, being the last month of the quarter; And according to his double Dignity in *Virgo*, he exalts all things from their Hectical Condition into a direct *Marasmus*. And now, every thing being full Ripe, and the Corn ready for the Sickle, and for the Honest Har-vest Mans Levelling Hand, and the Disease of this quarter being,

TRIGGE 1694.

being become thus desperate, it is in vain to think to restore its wasted Spirits by Cordials, or to hope to retrieve its almost decayed life by applying Pidgeons or Cupping-Glasses, or indeed by any other means.

Do you not see how orderly the Seasons of the Year are Governed by the several Planets in their turns? and this according to their Natures, as Astrologers have distinguished their Dignities.

And now having seen the Death of the Spring and Summer-Seasons, the only pleasant and Charming parts of the Year, Let us in the next place attend their Funerals, this being the last kind Office which one Friend can perform for another. And that will be by Considering—

III. The Autumnal Quarter.

The Autumnal or Harvest Quarter is the third Season of the Year, and the declining Equinox thereof. The Dayes and Nights are now again equal all the World over, and the Sun doth irradiate both Poles equally, as he did at the beginning of the Spring.

This Season begins where the Summer ends, viz. when the Sun toucheth the first Point of Libra, which this Year happens on September the 12. day 6 ho. 52 min. afternoon. At which time Capricorn Culminates, and the beginning of Taurus arises on the Horoscope, and it continueth all the time the Sun is passing through Libra, Scorpio, Sagittary; and the Governours of those Signs are Venus, Mars and Jupiter.

Kind Venus bestows her Tears upon the Horse of the deceased Summer, and thereby generates a Phoenix out of the old ones Ashes, whence in the first of these months we are made happy with a late Spring. But this not of any long continuance, but soon fading.

Then Mars comes next, and endeavors to add Heat and Dryness to the Moisture that Venus lent, thereby to Cherish the later Summer. But that too is soon returned by reason of the Suns absence, who is the Fountain of all Heat, and grand Principle of Generation.

But lastly, Jupiter takes his turn, and by his Balsamick Beams endeavors to be just what Mars and Venus of themselves could not, and so Conserves the Mummial Vertue of all Plants, Herbs, Fruits, Flowers, &c. for the good of Humane kind, whereby the Species of all things are preserved, at least to the End of this declining

T R I G G E 1694.

aining quarter, which is as far as his Gubernatick extends. And so leaves us to Consider of —

IV. The Brumal, or Winter-Quarter.

The Brumal or Winter-quarter always begins where the Autumnal Season ends; And Astronomically commenceth when the Sun salutes the first Scruple of Capricorn, the Earth being then farthest distanced from the Suns Perpendicular Rayes, receiveth greatest Portion of the Shadow, and least quantity of the Sunshine; thus causing shortest days and longest nights to all those that inhabit on this side of the Equator. The Sun is now in his Perigæo, or nearest distance from the Earth, bring in opposition to his Apogæon, which is Cancer.

This Dark and Melancholy quarter, begins this Year on December the 11. day, at 6 ho. 41 min. in the Morning, At which time *Libra* Mediates Heaven, and *Sagittary* adorns the East-Angle, as in the Spring. And it consumeth all that quantity of time the Sun is Transiting thorow the Signes *Capricorn*, *Aquarius*, *Pisces*, the Rulers hercof being *Saturn* and *Jupiter*.

But *Saturn* hath a double power to that of *Jupiter*, *Capricorn* and *Aquarius*, both being his Mansion houses. Hence it is, that all things now look with a sad and unpleasant face, wearing the Image of Death and Destruction. Now Frost, Snow, Hail, thick Clouds, Isicles, Extremity of Cold, Barrenness, and all things that are Negative to Delight and Pleasure, have their Regency.

Thus you see how all the Seasons are made, and how by struggling and contending interests maintain'd; and also how at the last *Saturn* proves the Devourer of his own Issue. And how benign *Jupiter*, by his more gentle moisture in *Pisces*, puts us in hopes of an approaching Spring.

And thus, by this orderly Rule of the Planets through the several Seasons of the year, are we put in mind of the several Parts of our Life agreeable therunto, — viz. — How we pass the Spring of our Youth, the Summer of our Manhood, the Autumn of our declining Years, and the Winter of our Old Age. — Where *Saturn* with his Sickle stands ready to Cut us down. And lastly, how by passing through this Vale of Misery, this natural Death, we Ascend to the Government of the true *Jupiter*, viz. to Immortality and a Blessed Life. where we shall be Company for Angels, and behold the Face of God in Glory. But

On!

TRIGG, 1693.

It to be Sown be of a middle Constitution or Condition, viz. betwixt dry and moist, it is then good to Sow it, when the Moon is in Libra, well befriended.

What you intend to Plant, let the Moon be in Conjunction, or in the 6th or 12th of Saturn, free from the Body or ill Beams of Mars, in a fixed Sign, as Taurus, Leo, Scorpio, or Aquarius, and be in some aspect of Jupiter or Venus, if possible.

In planting Trees or Vines, let the Ascendant be Fixed, and the Moon placed in an Earthy Sign, as Taurus, Virgo or Capricorn, in good aspect of Saturn.

Graft or prune Trees the Moon decreasing in Aquarius, and in aspect of Jupiter or Venus.

Fell Timber for Architecture from November the 22, to January 22. the Moon decreasing in Taurus, Virgo or Capricorn, and let her be in good aspect of Saturn.

Plash Hedges, fell Wood for Fuel, when the Stocks may the next year grow again, the Moon increasing in Aries or Libra, chiefly in the 1st quarter, Jupiter or Venus assisting.

Cut Vines in December, January or February the Moon in Aries, Taurus, or Libra. -- Remove Trees when she is in the 1st Signs, all the last quarter in November, December, or February, and dung Land, to prevent Weeds, in the 1st quarter.

Good to till Gardens, to Sow and set Plants and Herbs; to lay poles and make a Hoop-yard, The Moon in Libra or Aquarius.

Gather Apples, and other Fruits, Herbs and Flowers, to have them large and fat, the Moon increasing toward the Full: to keep and serve them in store, gather them dry, the Moon decreasing, in aspect of Jupiter or Venus.

Shear Sheep, cut Grass for Hay, the Moon increasing, so they will spring again the sooner.

Kill Fat Swine near the Full, the Fat will endure longer, better, and waste less than if kill'd at other times.

Gold Cattle, kill Lambs, the Moon decreasing free from the Beams of Saturn or Mars, and in some aspect of Jupiter or Venus.

Set Beans or Pease in the New Moon, and they will be early in blooming, and so run all up into Stalks: This is affirmed by an excellent Philosopher, Sir Ch. Heydon, in his admirable Discourse of Astrology.
